Varicella						1st Dose				
Hepatitis A (Hep A)						1st Dose		2nd Dose		
COVID-19					Dosage depends on age and vaccine type					

**Missed a shot?** If your child doesn't receive a shot at the recommended age, you don't need to start over. Just visit your child's health care provider to receive the next shot.

**Talk with your child's provider.** If your child has a medical condition that may increase their risk for infection or your child is traveling outside the U.S., talk with your child's provider about any additional vaccines your child should receive.

**Protect your growing baby.** Are you pregnant? Be sure to receive a Tdap vaccine in the third trimester of pregnancy to protect you and your baby against pertussis (whooping cough). You should receive the vaccine during each of your pregnancies.

**A SHOT AT HEALTH** Schedule your child's vaccinations today.
